

HACCP (Hazard & Critical Control Points)

HACCP is an internationally accepted approach for the management of food safety. It relies on the use of these 7 structured steps shown here >>>

Today, the hazards and risks related to food safety are numerous and stretch across many dimensions of your organization.

So how do you keep track of them all?

Horizon

can help you manage this challenge...

Use the intuitive Risk Register features of HORIZON to gain an up to date view of all barriers to achieving total food safety across your organization and what action is being taken to address them.

Work across functional, departmental and ownership boundaries to get a truly global view, safeguarding your consumers and confidence in your operation.

Projects	Processes
Sites	Markets
Roles	Products
Assets	Partners

Are these some of the dimensions to be managed in your organization?

HACCP (Hazard & Critical Control Points)

► Get the benefits...

Enable risk-based decision making to determine process and improvement priorities

Reduce duplication by building and maintaining libraries of common Hazards, Potential Events, Consequences, Controls and Potential Failures

Don't rely on a few specialists. Extend usage of the system to operational, functional and senior stakeholders across your organization and get the real picture.

► See across your supply chain

Product						
ID	Description		At Risk	Concern	Monitor	No
1	Baked Breads					
2	Coated Biscuits					
3	Confectionery					
4	Filled Pies					
5	Deli Meats					
6	Aluminium Sheeting					

Partner						
ID	Description		At			
7	Contractor X					
8	Contractor Y					
9	Customer 1					
10	Customer 2					
11	Regulator A1					
12	Regulator A2					

Link risks to your Sites, your Processes, Products & Services and your Partners whether they be Suppliers, Contractors, Customers or even Regulators.

Better still, get those partner organizations using your HORIZON system as well and develop a truly comprehensive view of risks and opportunities across your whole supply chain.
